Market commentary

- Session was risk-off and momentum INVERTED: the Top-10 minus Bottom-10 spread was -0.23%— higher-scored names sold off harder than the laggards (universe avg -0.29%). That is the momentum-reversal-in-a-selloff pattern, not a normal trend session.
- Hardest hit among the leaders: AXON -1.53%, SNPS -1.20%, HUBS -1.00%, APP -0.70%.
- The volatility governor is neutral: forecast vol — is at or below the 35.00% target, so exposure runs at the full base budget (1.00×).
- Held book returned -0.41% on the session; biggest detractor APP (-0.70%). Open positions remain net profitable on entry-to-date P&L.
- Stop-losses are armed (score below 0.90) on: APP (0.85) — the engine will exit these automatically if they keep sliding.

Recommendations — tonight → next open

- No names clear the persistence-entry score bar — no new buys set up. Hold and let the book ride.
- WATCHLIST — climbing fast but still below the entry bar: NU (▲33, 0.75), MRVL (▲32, 0.69), IBM (▲31, 0.46), NVDA (▲27, 0.77). No action; revisit if they push above the gate.
- EXITS — let the engine fire stops on its own at the open; do not pre-empt score-gated holds that are still trending. No discretionary selling.
- NET STANCE: constructive. Governor near full budget and the spread is non-negative— normal sizing on any triggered entries.

- EXITS — let the engine fire stops on its own at the open; do not pre-empt score-gated holds that are still trending. No discretionary selling.

- Hardest hit among the leaders: PLUG -7.66%, CDNS -1.83%, COIN -1.54%, OXY -0.69%.
- The volatility governor is neutral: forecast vol 28.46% is at or below the 35.00% target, so exposure runs at the full base budget (1.00×).
- Held book returned -0.43% on the session; biggest detractor LRCX (-3.73%). Open positions remain net profitable on entry-to-date P&L.
- Stop-losses are armed (score below 0.90) on: LRCX (0.35), BA (0.41), INTC (0.42), MU (0.42)— the engine will exit these automatically if they keep sliding.

Recommendations — tonight → next open

- WATCHLIST — climbing fast but still below the entry bar: SNOW (▲38, 0.60), OKTA (▲36, 0.63), AVGO (▲25, 0.75), ANET (▲25, 0.69). No action; revisit if they push above the gate.
- EXITS — let the engine fire stops on its own at the open; do not pre-empt score-gated holds that are still trending. No discretionary selling.
- NET STANCE: constructive. Governor near full budget and the spread is non-negative— normal sizing on any triggered entries.
