Market commentary

- Session was risk-off and momentum INVERTED: the Top-10 minus Bottom-10 spread was -2.78%— higher-scored names sold off harder than the laggards (universe avg -0.25%). That is the momentum-reversal-in-a-selloff pattern, not a normal trend session.
- Hardest hit among the leaders: SNOW -6.79%, DELL -6.58%, NOW -6.04%, TEAM -5.91%.
- The volatility governor is neutral: forecast vol — is at or below the 35.00% target, so exposure runs at the full base budget (1.00×).
- Held book returned -6.68% on the session; biggest detractor SNOW (-6.79%). Open positions remain net profitable on entry-to-date P&L.
- Stop-losses are armed (score below 0.90) on: SNOW (0.89)— the engine will exit these automatically if they keep sliding.

Recommendations — tonight → next open

- BUY candidates (clear the >0.90 entry score, not held): MRVL (0.95), OKTA (0.91). These trigger only on the 3rd consecutive day above the bar; max 2 new/day. Sized ~8.5% of book (per-name cap × 1.00× governor).
- WATCHLIST — climbing fast but still below the entry bar: MCHP (▲28, 0.42), BAC (▲24, 0.39), NXPI (▲22, 0.41), AMAT (▲19, 0.71). No action; revisit if they push above the gate.
- EXITS — let the engine fire stops on its own at the open; do not pre-empt score-gated holds that are still trending. No discretionary selling.
- NET STANCE: constructive. Governor near full budget and the spread is non-negative— normal sizing on any triggered entries.
