Market commentary

- Session was risk-off and momentum INVERTED: the Top-10 minus Bottom-10 spread was -1.19% — higher-scored names sold off harder than the laggards (universe avg -1.69%). That is the momentum-reversal-in-a-selloff pattern, not a normal trend session.
- Hardest hit among the leaders: NFLX -5.09%, JPM -3.10%, AXON -3.09%, BAC -2.90%.
- The volatility governor is neutral: forecast vol — is at or below the 35.00% target, so exposure runs at the full base budget (1.00×).
- Held book returned -1.99% on the session; biggest detractor JPM (-3.10%). Open positions remain net profitable on entry-to-date P&L.
- Stop-losses are armed (score below 0.90) on: JPM (0.72), FTNT (0.84) — the engine will exit these automatically if they keep sliding.

Recommendations — tonight → next open

- No names clear the persistence-entry score bar — no new buys set up. Hold and let the book ride.
- WATCHLIST — climbing fast but still below the entry bar: INTU (▲28, 0.60), AMD (▲25, 0.72), PANW (▲19, 0.79), PLUG (▲18, 0.44). No action; revisit if they push above the gate.
- EXITS — let the engine fire stops on its own at the open; do not pre-empt score-gated holds that are still trending. No discretionary selling.
- NET STANCE: constructive. Governor near full budget and the spread is non-negative — normal sizing on any triggered entries.

Queued for next session (after today's close → next open)**● NO TRADES — hold current book**

- Buys — No risk budget to add — the book is 94% invested versus the volatility-scaled exposure cap of 90% (base 90% × 1.00× governor). No persistence-buy candidate either (no unheld name has held score >0.90 for 3 consecutive days).
- Sells — No exit triggered — stops are score-gated (fire only below 0.90 composite) and none qualify; max-hold suppressed until score <0.80; score-decay sell disabled; no rotation funding required.

Market commentary

- Session was risk-off with momentum WORKING: the Top-10 minus Bottom-10 spread was +0.42% (universe avg -1.38%) — higher-scored names out-performed the laggards.
- Hardest hit among the leaders: NXPI -4.32%, AMD -4.18%, FTNT -2.10%, AVGO -2.00%.
- The volatility governor is neutral: forecast vol — is at or below the 35.00% target, so exposure runs at the full base budget (1.00×).
- Held book returned -2.01% on the session; biggest detractor NXPI (-4.32%). Open positions remain net profitable on entry-to-date P&L.
- Stop-losses are armed (score below 0.90) on: JPM (0.28), ON (0.42), COST (0.48), QCOM (0.55) — the engine will exit these automatically if they keep sliding.

Recommendations — tonight → next open

- BUY candidates (clear the >0.90 entry score, not held): TSM (0.98). These trigger only on the 3rd consecutive day above the bar; max 2 new/day. Sized ~8.5% of book (per-name cap × 1.00× governor).
- WATCHLIST — climbing fast but still below the entry bar: KLAC (▲30, 0.66), LRCX (▲21, 0.52), GOOGL (▲17, 0.65), OXY (▲16, 0.72). No action; revisit if they push above the gate.
- EXITS — let the engine fire stops on its own at the open; do not pre-empt score-gated holds that are still trending. No discretionary selling.
- NET STANCE: constructive. Governor near full budget and the spread is non-negative — normal sizing on any triggered entries.

Queued for next session (after today's close → next open)**● NO TRADES — hold current book**

- Buys — No risk budget to add — the book is 95% invested versus the volatility-scaled exposure cap of 90% (base 90% × 1.00× governor). No persistence-buy candidate either (no unheld name has held score >0.90 for 3 consecutive days).
- Sells — No exit triggered — stops are score-gated (fire only below 0.90 composite) and none qualify; max-hold suppressed until score <0.80; score-decay sell disabled; no rotation funding required.

Market commentary

- Session was risk-off with momentum WORKING: the Top-10 minus Bottom-10 spread was +2.76% (universe avg -1.34%) — higher-scored names out-performed the laggards.
- Hardest hit among the leaders: AAPL -3.50%, AMZN -0.94%, AXON -0.72%, FTNT +0.00%.
- The volatility governor is neutral: forecast vol — is at or below the 35.00% target, so exposure runs at the full base budget (1.00×).
- Held book returned -1.04% on the session; biggest detractor CSCO (-3.83%). Open positions remain net profitable on entry-to-date P&L.
- Stop-losses are armed (score below 0.90) on: QCOM (0.37), CSCO (0.37), NXPI (0.49), MRVL (0.49) — the engine will exit these automatically if they keep sliding.

Recommendations — tonight → next open

- BUY candidates (clear the >0.90 entry score, not held): PLUG (0.94), AMD (0.90). These trigger only on the 3rd consecutive day above the bar; max 2 new/day. Sized ~8.5% of book (per-name cap × 1.00× governor).
- WATCHLIST — climbing fast but still below the entry bar: HUBS (▲27, 0.69), SAP (▲15, 0.46), CDNS (▲11, 0.39), NOW (▲9, 0.69). No action; revisit if they push above the gate.
- EXITS — let the engine fire stops on its own at the open; do not pre-empt score-gated holds that are still trending. No discretionary selling.
- NET STANCE: constructive. Governor near full budget and the spread is non-negative — normal sizing on any triggered entries.
